Contra las corridas de toros

Against the bullfighting

Contre la corrida

Contro la corrida

Bullfights are an example of violence that is unjustifiable in the XXI century.
It is a practice based on the humiliation, torture and the exhibition of an agonising death of a living being. Bullfights generate negative emotions and are opposed to the ethic values of today's Society. This degrading and cruel practice does not represent any cultural, moral or social value that deserves to be recognized or protected by an International organization of the United Nations.

Therefore, We, the undersigned, urge the UNESCO to REJECT the request of recognition and protection of bullfights as a World Intangible Cultural Heritage.
